### Vinyl Privacy Fencing

An attractive and solid wall offers the ultimate in privacy. Available with or without decorative accents (such as the lattice version shown), this style is not only the ideal "four wall" system for your outdoor room, it also dampens street noises when married with lush garden plantings.

These panels feature "V" jointed Tongue & Groove slats which contain ribs to give support and a dimensional look. Available in eight-foot panel widths, this style features a galvanized steel insert in the lower rail to ensure long-term stability and ensure that your fence panels will never sag.

### Configurations & Options

**Picket Top**  
Available in  
Pointed.

**Post Caps** Available in French Gothic, Ball and  
Pyramid External or Internal.

**Color** White.

**Fencing** 5 different styles to choose from. Shown here: Universal II, Universal III, Wide Picket, Privacy with Lattice and Privacy. Most styles available in heights from 4' to 6'.

### Vinyl Contemporary Picket

Pickets here are attached through the rails instead of attached to the rails, offering a sleek and modern appearance. This also provides a "Good Neighbor" solution, which means that both sides of the fence have the same aesthetically pleasing appearance. Available in classic picket or a more modern contemporary look, such as the Universal II style with French Gothic post caps (Shown at left).

### Classic Picket

This series brings you back to the old red cedar picket fence design, but of course without the maintenance that came with those timeless classics. These all-American styles offer an elegant, defined and decorative border to your property...restricting access and adding beauty.
